Description of Varieties

Schley

Tree vigorous grower, bears young; season early. Nut large, thin shelled, full meated, crisp, very high quality; one of the highest priced nuts grown. Will succeed over a wide range of country.

Stuart

One of the first introduced and a standard. Will succeed over a wide range. Tree vigorous; bears young; prolific. Nut large size; fairly good cracker, largely planted for commercial orchards.

Pabst

Much the same type as Stuart. Shell, medium, but cracks more readily. Meat separates better. Nut fills well; high flavor.

Frotscher

Tree very sturdy grower, beautiful shape; bears young and is prolific. Nut very thin shelled. Meat readily comes out whole, rather dry, medium flavor, succeeds over wide range of country.

VanDeman

A large and rather long nut; is much liked by the trade on account of its shape; worthy of propagation.

Russell

Tree slender grower, young and prolific bearer. Nut large, very thin shelled, cracks easily. Flavor, good. More especially suited to the Gulf Coast.

Terms and Conditions

Season

From December 1st to March 1st. Orders booked at any time to be shipped when wanted.

Packing

No charge for packing.

Prices

Five at 10 rate, 50 at 100 rate, 500 at 1000 rate. The high quality of our trees should be considered in comparing prices.

Terms

Cash with order, or one-fourth cash and balance when shipping season opens.

Age of Trees

Our grafts are one and two years old on two and three year roots. Our soil is such that we produce a tree in one year less than in most localities, and one that is more stocky and full of life; trees that cannot help but grow if reasonable care is used in planting and caring for them.

Transportation at Purchaser's Risk

As soon as goods are delivered to forwarding companies our responsibility ceases.

Claims

Should any error occur we will gladly rectify same if notified upon receipt of stock.

Guarantee

We guarantee all stock sent out to be well rooted, well grown, true to name, properly packed and shipped according to instructions. Our liability under the foregoing guarantee is limited in amount to the original price received.

Aid in Selecting Stock

We will gladly assist our customers in selecting varieties when so desired. We have several hundred acres of pecans planted in orchard and are constantly increasing the acreage.

We Grow Nothing But Pecans

PECAN orchards offer the safest and best means of acquiring a steady and an increasing income with most of the risk eliminated.

The trees, under proper care, bear in six or seven years, and each year produce a larger crop. They are easily grown, easily handled, and are free from risk of spoiling and very profitable. There is no danger of overproduction, as the demand far exceeds the supply.

Great industries have great centers, and we find Monticello headquarters for the pecan nursery business. There are reasons for this: Trees can be grown more cheaply and of a better grade at Monticello than in many other places. Other sections require three years from time of planting seed before trees are salable. We grow them in two years, at the same time producing a more sturdy tree and one that is worth more and will live better.
